

2011 UAS Test and Production Site Links

Step 1.

We would appreciate it if you would first load a file in on the Test site:
<https://managertst.getmydocument.com>. This environment has been refreshed from production and contains all pertinent 2011 changes. This environment will **not** be refreshed on a daily basis.

Student test site: <https://wwwtst.getmydocument.com>

Step 2.

When you feel you have the file ready to go, you can do one more test at:
<https://managertst1.getmydocument.com>. This environment **will** be a daily refresh of production from the previous day. Clients should not expect uploads to persist across multiple days. The purpose of this environment is to allow clients to do final testing before uploading into production.

Student test 1 site: <https://wwwtst1.getmydocument.com>

Step 3.

Load file to production: <https://manager.getmydocument.com>

Student Live site: <https://www.getmydocument.com>
