On Friday March 1, 2019 the Interactive Reporting (IR) Tool was fully transitioned to the UWBI OBIEE Tool. This tool will allow the transformation of data through a modern source of reliable information derived from administrative and institution-specific systems. UWBI is more than just queries and reporting; it integrates sophisticated techniques and tools to interact with the information.

With the transition to a new tool, we want to remind everyone of the helpful training and resources available to you:
