Updates in Licensing & State Trends

Stephanie Sticka, Division of Food and Recreational Safety, Bureau of Food & Recreational Business

WISCONSIN DEPARTMENT OF AGRICULTURE, TRADE AND CONSUMER PROTECTION (DATCP)

DATE: January 19, 2021
OBJECTIVE

ADDITIONAL LICENSING EXPECTATIONS WITH COVID-19 AND TRENDS FROM AROUND THE STATE
AGENDA ITEMS

- COVID FAQ’s
- 2020 State Trends
- ATCP 78 Revision Overview
WI Camps At A Glance

231 total licensed recreational & educational camps*

2021 License Renewal Update
- 2019-20=231
- As of 1/14/2021=230

*Included in Healthspace (without Dane, Milwaukee & Taylor Counties)
COVID-19 WITHIN ATCP 78/DATCP
ATCP 78 CERTIFICATION RENEWAL AVAILABILITY

*FIRST AID, CPR, LIFEGUARD, CFPM

You will not be penalized if a health staff member or user group at your camp has an expired certificate, as long as that expired certificate is from an approved course. Health staff are expected to complete requirements for certification as soon as possible when courses do become available.
78.19 (2) HEALTH HISTORY
VACCINATION STATUS

- No requirement to include any vaccination history (including COVID-19)
- Approved COVID-19 vaccinations are only approved for population aged over 16
Isolation plans and space available for sick campers?
- Multiple sick campers?
- Length of time before parents can pick-up?

Unique to each camp premises

"A Case For Camp"
Camps extended beyond existing consulting physician, forming medical advisory boards, or contacts with medical professionals close to pandemic and knowledgeable of camp for successful planning
Ability for staffing if large number of staff are ill, or quarantined?

Cross trained or enough staff able to cover supervision ratios?

<table>

</tbody>
</table>
COVID FAQ'S FROM DATCP
Q: DO CAMPS REQUIRE A COVID-19 TEST BEFORE ARRIVAL?

A: Many resources guide this answer
- Parents screen campers at home pre-camp
- 3-7 days prior COVID-19 test results of campers, pre-camp quarantine
- Staggered drop off health screening questionnaire (drive through idea)
- Ongoing temperature monitoring, rapid testing and symptom screening questionnaire
Q: Ability to use washable gowns vs. disposable? Aprons or need sleeves?

A: ATCP 78 has no requirement for health staff clothing. Follow best practice resources from ACA/CDC

Washable gowns ok as long as they are worn, laundered, and stored properly

CAMP CAPACITY

Q: Camp wants to open 2021 at full capacity—anything stopping them?

A: 1st Check with Local Health Department for any restrictions mass gathering
- Isolation and quarantine ability?
- Staffing ability?
- Length of camp session?

"A Case For Camp"

Longer session with same kids 2 weeks+
Staff & camper "bubble" policy not allowed to leave camp the entirety of session
**VENTILATION IN CABINS?**

**Q:** What are cabin ventilation requirements for 2021?

**A:** ATCP 78 only requires floor spacing and overall space in sleeping quarters:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Space</th>
</tr>
</thead>
<tbody>
<tr>
<td>Horizontal space between beds</td>
<td>3 feet</td>
</tr>
<tr>
<td>Head to Head space of campers</td>
<td>6 feet</td>
</tr>
</tbody>
</table>

Overall space for each camper over 12 years 400 cubic feet, or under 12; 200 cubic feet

Best practice for ventilation per CDC:
NON-PHARMACEUTICAL INTERVENTIONS

- Pre-arrival quarantine and testing
- Cohorting
- Symptom monitoring
- Physical distancing
- Mask use
- Enhanced hygiene measures
- Enhanced cleaning and disinfection
- Outdoor activities and programming
- Early identification of infections and isolation
- Ventilation Indoors

Abundant Practical Tips Such As:
Pricing Structure- 7 weeks for 8 week price to upfront, to provide thermometers, extra testing, transportation increased costs staggered arrivals
LESSONS LEARNED ACA SAFE CAMP ADVOCACY 12/1/2020

- Not that COVID wouldn’t enter camp but prepared when it comes
- Contactless Check-in/out options
- Offer planning videos to help campers/parents to see camp ahead of time ex. understand pod, family, cabin small groups
- Taco Day is Hard during COVID-19

- Templates R & D

ATCP 78 REVISION ADVISORY UPDATE
ATCP 78 CODE REVISION TIME LINE

APRIL 3, 2022 ENTIRE RULEMAKING PROCESS MUST BE COMPLETED

★ OCTOBER-NOVEMBER 2021 TARGET FOR PUBLIC HEARINGS ★

SUMMER 2021 SANITARIAN WORKGROUP ON CRITICALITY- DESIGNATES CODE PROVISIONS MORE LIKELY TO CAUSE ILLNESS, INJURY AND/OR RISKS

HERE AND NOW: INDUSTRY INPUT DRAFT REVISION TOPICS AND SUBCOMMITTEE VIRTUAL WORK
TOPICS FOR CONSIDERATION:

- CHALLENGE COURSE INSPECTION AND TRAINING
- ALTERNATIVES FOR MEDICATION ADMINISTRATION
- OPERATIONS BASED LICENSING & FEE SCHEDULE/CAMPS SERVING RENTAL GROUPS
- CAMPER SAFETY (BACKGROUND CHECKS & SEXUAL MISCONDUCT TRAINING)
- HEALTH SUPERVISION REQUIREMENTS BASED ON EMS RESPONSE DISTANCE
- AND MUCH MORE

Thank you for working with the State (WI DATCP) to shape regulations. If anyone has suggestions, issues or questions please reach out your advisory members- Stay connected, come to future public hearings, we’d love to meet you!

WHY Windows Effectively Screened?

Inspection Criteria to Ensure Summer Camp Buildings are Bat Proof

1. Prior to campers or staff entering any building initially inspect each structure to ensure that bats are not currently present. Examine the following areas closely:
   a. Attic: examine both sides of each rafter and ceiling joist
   b. Crawl space: examine both sides of each floor joist and entire foundation
   c. Exterior fascia: examine for points of entry. This may require examining the building at night to see if bats exit any part of the structure.
   
   If bats are identified in the structure DO NOT let campers or staff work or sleep in the building. Contact a Wildlife Damage Control Agent to safely exclude bats from the structure at http://www.ncwildlife.org/Insects/Wildlife/Inspection/Contact/WDCA.htm

2. Repair or modify camp buildings to keep bats and other animals out. Make sure all small openings are identified and sealed or constructed to prevent entry of bats. Examples of bat entry points are: (bats can fit through an opening as small as 3/8")
   a. Soffit and ridgevent vents
   b. Sewer line vents that penetrate the roof
   c. Electrical conduit entry points
   d. Crawl space vents
   e. Loose door and window seals and frames
   f. Chimneys and chimney caps

   Material that can be used to eliminate points of entry includes caulk, spray in foam (e.g. Dow Great Stuff®) wire mesh or screen and steel wool.

3. Don’t allow occupancy of buildings until they are animal proof. and free of unwanted animals: INCLUDING BATS (see #2)
   a. Instruct campers to keep screens on all windows and promptly fix tears.
   b. Keep doors closed.
Bunk Bed Guardrail Illustration

Non-Continuous (Open) Guardrail Bed Style

Continuous (Connected) Guardrail Bed Style

Note: Guardrail requirements apply to both sides of the bed when the bed is not secured against a wall.

WHY?
Federal Safety Standards
Head and Neck Entrapment Risk
