Key

Redirect Connection: If you click the link it takes you to the other tool. (ex. click on a quiz link in modules it will take you to the Quizzes tool).

Storage Connection: The linked item is stored in the other tool (ex. click on a pdf link in modules it will open the resource that is stored in Files).

Direct Connection: Changes made in one tool updates in the other tool as well. (ex. change a discussion prompt in Discussions and it will update in Modules).

No Connection: There is no connection between these tools.
