

CDR Liaisons

The CDR liaisons are institutional representatives responsible for the coordination of all activities at their institutions which relate to the preparation and submission of CDR data. As a part of these coordination responsibilities, liaisons will work with functional area staff (such as in Admissions, Financial Aid, and Registrar’s Offices) and with information technology staff to ensure the accuracy and completeness of CDR data submissions for their institution. For “PeopleSoft campuses,” liaisons will represent their institution on CDR issues related to the CDR/MAAD/TIS interface programs, ensuring involvement from functional and technical staff so that informed and timely decisions can be made.

DATA ELEMENT DESCRIPTION

NUMBER: 1130
NAME: SECTION LENGTH
DEFINITION: The number of weeks that this section meets (including final exam period).

CODING REQUIREMENTS

LENGTH: 2 positions
DECIMAL POSITION: N/A
SPECIFICATIONS: Must be numeric and less than 19.

Following is UW System Administration's understanding of each institution's total number of rounded weeks of instruction for each term of academic year 2021-22. The weeks of instruction are calculated as follows. First, the total days of instruction are arrived at by adding up the total number of days in a term (Monday-Friday) minus legal holidays (e.g., Labor Day) and the spring break period in Term 2. Final exam period is included as part of the total days of instruction. After the total days of instruction are derived, this figure is divided by five (and rounded to the nearest whole number) to arrive at weeks of instruction. If the length of term is other than stated, please notify the Office of Policy Analysis and Research of the correct length of the term in whole weeks.

Example: A student completes courses at both Barron County and at Eau Claire main campus. They receive an AA degree at Barron County and a Bachelor’s degree at Eau Claire main campus. Since these are different degree types, they can be recorded in the appropriate Student Record.

Example: A student completes courses at both Barron County and at Eau Claire main campus. They receive a Bachelors degree at Eau Claire main campus. The degree should be recorded at Eau Claire main campus.

Example: A student completes courses at both Barron County and at Eau Claire main campus. They receive multiple Bachelors degrees at Eau Claire main campus. The degree should be recorded at Eau Claire main campus. (Follow the requirements for reporting Majors and Degrees in DE 2430 and DE 2420)

NOTES: *Definition of “Student Record Set” (Unit/Division/CSID). Students who take courses at multiple locations within a single unit (receiving institutions only) will have multiple records, one for each branch (division) where they enrolled in a course. These multiple records make up a “Student Record Set”. For example, if student (CSID ‘12345’) enrolls in a course at Whitewater Main (Unit ‘N’, Division ‘Null’) and a course at Rock County (Unit ‘N’, Division ‘28’), there would be two records listed at Unit ‘N’ for that one student.* +

Preparation of CDR Data

Institutions submit CDR data under the CDR data element definitions, edit criteria, and guidelines in effect for the academic/fiscal/calendar year for which the data is submitted. The submission schedules in Part III of Volume I of the CDR indicate the dates on which the various data submissions are due.

The due dates for submission of the CDR files have been developed with two goals in mind. The first goal is to provide the institutions with as much time as possible for preparing and editing the data prior to submitting it to System Administration. The second goal is to provide System Administration with the data in a timely manner in order to meet various state and federal reporting requirements. In the light of these goals, various procedures have been developed over the years to assist the institutions and System Administration in submitting and processing the CDR data.

- A. The CDR liaisons (or their representatives) submit CDR data to System Administration according to the appropriate submission schedule using the File Transfer Process (FTP).
- B. In the event that an institution determines that it cannot submit CDR data as scheduled, the CDR liaisons should notify the CDR Technical Coordinator as soon as any delay in submission is known.
- C. Changes to the identifiers for students, course sections, etc., (i.e., key changes) are initiated by the institution. The timing of such changes is critical in those instances where data for the same entity may be submitted at different times during a term (e.g., post-term student data is submitted about three months later than the 6th week student data and social security numbers for some students may differ). The CDR Technical Coordinator should be notified of key changes prior to submission of any data which incorporate such key changes.

When an institution determines that additional data must be submitted to System Administration in the form of a memo, or a transaction file, and the additional data are not in response to any edit produced by System Administration, the additional data should be sent to the CDR Technical Coordinator with the data area, year and term, and data elements affected clearly indicated. The key changes discussed above are in this category.

Data Submission Schedule

The data submission schedules for each campus are presented on the following pages. The schedules are summarized by academic term.

Student data is to be developed and reported for each academic term as specified. Financial Aid student data is reported annually.

Complete curricular data is required for each academic term as specified. Faculty survey data may be required when planned analysis dictates the need. Institutions will be advised of this one semester in advance.

The formats for the first and second term data submission schedules are identical. The beginning dates of instruction, date of record (for 6th-week data submission) and dates of submission are specified for each campus. It is important to note that for the student area, there are two data submission cycles indicated under “Dates of Submission” on each data submission schedule: a 6th-week and a post-term data submission. The format for each of these two submission cycles is unique and, hence, is treated separately and in detail in a later section in Part III. All of the data to be submitted for a given term must have a date of record as indicated for that given term. Each of these data submissions requires a unique format and must be submitted as a separate file.

Note: Until the late 1980’s, UW-River Falls and UW-Superior were on quarter systems and, therefore, submitted a Term 3 CDR. UW-Superior’s last Term 3 CDR was in 1987-88 and UW-River Fall’s last Term 3 CDR was in 1989-90.

MAAD (Multiple Application and Admissions Database) files are submitted monthly with data on upcoming summer/fall term undergraduate applicants. The submissions begin in October and continue through the “end of cycle” the following September. There is also one “end of cycle” submission that includes data for spring term undergraduate applicants which is due in March.

DATA EDIT DESCRIPTIONS

The Data Edit Description section contains the technical specifications for editing the data elements currently defined in the CDR. Each edit is uniquely identified by a six-character code in the form XXXX-YZ. The first four positions (XXXX) identify the Error Number, the fifth position (Y) identifies the Edit Type, and sixth positions (Z) identifies the Edit severity.

Error Number (XXXX)

The edits are listed in sequence by Error Number which is either the number of the data element being edited, or is a fabricated number which represents the edit of a group of data elements in combination.

When a group of data elements must be edited together, i.e., a combination edit, the Error Number has been developed on the basis of the following coding scheme; each position of the Error Number identifies a significant aspect of the combination edit.

Position 1: contains a code identifying the data area to which the element belongs; the valid codes are as follows:

1 = Curricular data area

2 = Student data area or Financial Aid data area

5 = Multiple Applications and Admissions Data (MAAD)

Position 2: contains a '9' to identify the Error Number as a combination edit.

Position 3: contains a code identifying the submission cycle which the edit addresses; the valid codes are as follows:

8 or 9 = sixth-week submission cycle

P = post-term submission cycle

A = annual submission cycle

Position 4: contains a number which uniquely identifies the combination edit in sequential order within the edit set defined by Positions 1 through 3.

Thus, Error Number 2981 identified the first combination edit of the student sixth-week submission cycle. The individual data elements included in each combination edit are listed in the sequence which is required for the edit.

Edit Type (Y)

The Edit Type code identifies the type of relationship considered in each edit. The following codes are used:

- 1 = Intra-element; an edit of a single element with no reference to the element's relationship with any other element(s).
- 2 = Inter-element; an edit of the relationship(s) between an element and any other elements within the same data area.
- 3 = Inter-file; an edit of the relationship(s) between the files of a single submission cycle (e.g., sixth-week student and sixth-week curricular).
- 4 = Inter-submission cycle; an edit of the relationship(s) between the files of a single data area (e.g., sixth week student and post-term student).
- 5 = Inter-period; an edit of the relationship(s) between the files of a single data area but over different submission periods (e.g., student's entrance status for summer and fall semesters).
- 7 = Inter-record; an edit of the same element(s) between records of a single file and single submission cycle (e.g., the same element across all sections of a course on the sixth-week curricular file).

Edit Degree (Z)

The Edit Degree code indicates the severity of the error identified by the edit. The following codes are possible

- 1 = An error which must be corrected. In all cases, the invalid data is left on the file.
- 2 = A reasonability exception which may be an error; correction is necessary if it is determined to be an error

Examples:

- a. 2020-11: The data code of Gender (DE 2020) in the student data area is in error. The invalid data remains until the data element is corrected.
- b. 2170-21: The division (DE 2170) in the Student data area is in error in relation to unit (DE 2160). Either or both of these codes might be invalid.
- c. 2981-41: The elements included in this combination edit of the sixth-week student submission do not match the post-term student submission.
- d. 2340-22: The total credits carried by the student are greater than the reasonability limits. This may or may not be an error.

Exceptions

Edits associated with post-term student course section enrollments are indicated as XXXXpYZ, where XXXX, Y, and Z, remain the same as the equivalent edit on the sixth-week submission and the "p" indicates that the edit applies to the post-term student course section record.

- 2175-71 a) *The Home Institution Division (DE 2175) must be the same for all Student Records in a Student Record Set.* **+Sp/21**
- b) *Student Classification (DE 2210), Resident Status (DE 2220) and Entrance Status (DE 2240) along with all Type I Personal data should be the same across all Student Records in a Student Record Set.* **+Sp/21**

Example: A student completes courses at both Barron County and at Eau Claire main campus. They receive an AA degree at Barron County and a Bachelor's degree at Eau Claire main campus. Since these are different degree types, they can be recorded in the appropriate Student Record.

Example: A student completes courses at both Barron County and at Eau Claire main campus. They receive a Bachelor's degree at Eau Claire main campus. The degree should be recorded at Eau Claire main campus.

Example: A student completes courses at both Barron County and at Eau Claire main campus. They receive multiple Bachelor's degrees at Eau Claire main campus. The degree should be recorded at Eau Claire main campus. (Follow the requirements for reporting Majors and Degrees in DE 2430 and DE 2420)

NOTES: *Definition of "Student Record Set" (Unit/Division/CSID). Students who take courses at multiple locations within a single unit (receiving institutions only) will have multiple records, one for each branch (division) where they enrolled in a course. These multiple records make up a "Student Record Set". For example, if student (CSID '12345') enrolls in a course at Whitewater Main (Unit 'N', Division 'Null') and a course at Rock County (Unit 'N', Division '28'), there would be two records listed at Unit 'N' for that one student.* **+Sp/21**

a) *This edit does not apply to post-term add records which do not include data on Student Classification (DE 2210).*

b) *When editing post-term data, official CDR enrollments will likely have been established, i.e., the sixth week files have been closed. NOTES: *If no Degree Earned This Term (DE 2420/1) was granted, then this element should be blank (b) and all the associated edits are bypassed.*

If a degree is conferred after the term's CDR post-term processing period, it should be included in the next term's post-term submission.

In all other cases, certificate types should be applied consistent with the coding structure above.
