

CURRICULAR DATA AREA

Overview

The Curricular Data Area identifies and describes elements of data which pertain to course-sections taught within the University of Wisconsin System. Several combinations of these data elements may be used to develop a complete curricular (course-section) data record. Therefore, the data elements have been grouped according to their use into four primary types, i.e., Type I, Type II, and Type III. Page II.B.2 illustrates the way in which these three types can be combined to produce a complete record. Dotted lines on this diagram are to be interpreted as meaning that the elements being referred to are not required for logical record completion. Elements for which multiple occurrences are possible are depicted on the diagram in recurring blocks. Neither the diagram nor the logical listing of data elements is to be construed to imply a physical record layout.

Each complete record identifies and describes a unique course-section. Uniqueness is established by a single combination of four data elements contained within the Type I descriptors, i.e., Unit (including Division for UW Receiving Institutions), Curricular Area, Course Number and Section Number. These four elements are referred to as the entity key. Whenever one of these descriptors changes, another unique course-section is identified. These, along with the remaining Type I descriptors, form the nucleus of a course-section description. The Type I descriptors as a set must be present once within each unique record. Within the Type I descriptors, the combination of Division, Department, and Sub-Department identifies the budgetary unit to which the instructional activities of a course section are credited. A single budgetary unit is usually credited with the instructional activities of all course-sections within a Curricular Area. However, more than one budgetary unit may contribute resources to some or all of the course sections within a Curricular Area. When this situation occurs, the instructional activities of each course-section should be prorated to the contributing budgetary units, i.e., each budgetary unit and the percentage of course-section activity attributable to it should be identified.

Each unique course-section should be further described by the addition of at least one set of Type II descriptors. When two or more instructors share the instructional responsibilities of a unique course-section, the Type II descriptor set must be repeated for each instructor. The Type II descriptors should include at least the instructor social security number/instructor person ID number of the individual(s) who is teaching the course-section. In addition to the Type I and Type II descriptors, selected unique course-sections may require one or more sets of Type III descriptors to produce a complete curricular data record. The Type III descriptors describe the duration of the instructional activities. Type III descriptors are necessary only for course-sections which provide scheduled group instruction and are not identified as fully distance education [group instruction is defined by DE 1100 with values other than Independent Study(I), Field Experience(F), and Extended Degree(E); see DE 1100; fully distance education course sections are identified by DE 1450, with a value of 'T'].

* Collectively, these elements establish the unique identity KEY

NUMBER:	1035
NAME:	Cost Center Hierarchy
DEFINITION:	The Workday code for the academic department that conveys the instructional activity and incurs the fiscal and human resources for the course-section. This element replaces the DDS (Division-Department-Subdepartment).

CODING REQUIREMENTS

LENGTH:	9 positions.
DECIMAL POSITION:	N/A
SPECIFICATIONS:	Must be one of the valid Cost Center Hierarchy Level 7 codes (Reference ID) per the CAC-Cost Center Hierarchy table for the unit/division and curricular area. The 9-character code must start with the Workday prefix “CCH” followed by six numbers.
EXAMPLE:	For the academic subject of Biology in the College of Science and Health at UW-La Crosse, the value should be ‘CCH004174’.
DEFAULTS:	During the build process, a unique Unit (DE 1010), Division (DE 1020) and CCH (DE 1035) combination can be present only once per course section per term. Data for duplicate Unit, Division and CCH combinations are dropped.
EDITS:	1035-11 a) The first three positions must contain “CCH” and the last six positions must contain numbers b) A valid code must be present for the reporting unit/division on the CAC table.

DATA ELEMENT DESCRIPTION

NUMBER: 1045
NAME: SECTION ALLOCATION COEFFICIENT (optional)
DEFINITION: This element is used in conjunction with the DDS elements: Division (DE 1020), Department (DE 1030), and Sub-Department (DE 1040). It represents the percentage of instructional activity (student credits, enrollment, faculty contact hours, and faculty effort) generated by this course-section that are to be credited to that specific DDS which must at least partially support the salary of the instructor(s) teaching the course-section.

CODING REQUIREMENTS

LENGTH: 3 positions
DECIMAL POSITION: N/A
SPECIFICATIONS: Numeric and not greater than 100. The sum of the Section Allocation Coefficient's (DE 1045) for a given course-section must add to 100%.
EXAMPLE:
DEFAULTS: During the build process, the record is bypassed if non-KEY DDS (Division (DE 1020), Department (DE 1030), and Sub-Department (DE 1040)) is equal to spaces and SAC (Section Allocation Coefficient (DE 1045)) is equal to zeroes, or if there are no occurrences of non-KEY DDS. Also, during build process, if element is non-numeric or zero, 100 is assumed as the correct value.
EDITS: 1045-21 This element must be greater than zero and the sum of this element for each unique section must equal 100.

NAME: COURSE CREDIT MAXIMUM
DEFINITION: The maximum per student credit for which the course is being offered as stated in the course description. If sections within a course are offered for a credit range, this element should reflect the best judgment of the campus as to the maximum credit for which a student typically would take the course. If the course is offered for a single credit level, the maximum and minimum course credits should be the same, see Course Credit Minimum (DE 1070). If the course credits have been prorated to the appropriate sections (see DE 2340 Student Credits by Section (prorated)), then this element should reflect the maximum prorated credits for any section offered within a course.

CODING REQUIREMENTS

LENGTH: 3 positions
DECIMAL POSITION: 99V9
SPECIFICATIONS: Implied decimal between 2nd and 3rd positions from the left.
EXAMPLE: Maximum per student credit is 4½; this element is '045'.
DEFAULTS:
EDITS:

1080-12 *A number between 00.0 and 16.0, inclusive, should be present.*
Note: All course-sections with a UDDS code related to UW-Madison's Medical or Vet Medicine Schools ('A53' or 'A87') are ignored for this edit. Also, this edit is ignored for UW-Eau Claire's study away course-sections (Study Away Indicator (DE 1420) equals 'A', 'E', 'X', or 'S'). x

1080-21 *A number equal to or greater than the Course Credit Minimum (DE 1070) for the same course must be present.*

DATA ELEMENT DESCRIPTION

NUMBER:	1090
NAME:	SECTION NUMBER
DEFINITION:	A five character <u>unique</u> identification for each section taught within each course. This identification must appear in the campus timetable file. A section is defined as a group of students meeting at the same time and in the same place for the same type of instruction with the same faculty. Sections may <u>not</u> be artificially derived to serve other functions (i.e., number of credits registered for, student level, etc.), except for certain independent-study and field experience sections for which the section number is used to identify the instructor.

NUMBER: 1100
NAME: TYPE OF INSTRUCTION
DEFINITION: A one character code indicating the primary type of instruction used in a course section.

CODING REQUIREMENTS

LENGTH: 1 position
DECIMAL POSITION: N/A
SPECIFICATIONS: Valid codes are 'C', 'D', 'E', 'F', 'I', 'L', or 'S'.

<u>CODE</u>	<u>DEFINITION</u>	
C	<u>Lecture</u> : Group instruction where the primary focus is on the instructor presenting information.	X
L	<u>Laboratory/Studio</u> : Independent group activity under instructor supervision. Activity may occur in a facility with special equipment. Laboratory/Studio instruction includes group art and music instruction.	X
D	<u>Discussion</u> : Group instruction where the primary focus is on student interaction and group discussion.	X
E	<u>Extended Degree</u> : Extended Degree Program course offerings only.	
F	<u>Field Experience</u> : Instruction generally occurring outside the classroom setting. Sections are determined by the span of supervision of a particular faculty member rather than the meeting time and place. Examples include student teaching, internship, clinical experience, and field work (where that represents the total contact of the course).	X
I	<u>Independent/Individualized Instruction</u> : One-on-one activity between instructor and student where the focus is on individual attention. Course sections may be described as "Independent Study, Reading, or Individualized Research." This category also includes auto-tutorial, individual instruction, and individualized music lessons.	X
S	<u>Seminar/Colloquia</u> : A group of advanced students at the undergraduate or graduate level studying with an instructor or under the leadership of several instructors.	X

EXAMPLE: If the type of instruction is discussion; this element is 'D'.

SPECIFICATIONS:	Must be numeric.

Following is UW System Administration's understanding of each institution's total number of rounded weeks of instruction for each term of academic year 2023-24. The weeks of instruction are calculated as follows. First, the total days of instruction are arrived at by adding up the total number of days in a term (Monday-Friday) minus legal holidays (e.g., Labor Day) and the spring break period in Term 2. Final exam period is included as part of the total days of instruction. After the total days of instruction are derived, this figure is divided by five (and rounded to the nearest whole number) to arrive at weeks of instruction. If the length of term is other than stated, please notify the Office of Policy Analysis and Research of the correct length of the term in whole weeks.

NAME:	INSTRUCTOR SOCIAL SECURITY NUMBER
DEFINITION:	A nine-digit unique number assigned by the Social Security Administration or other proper authorities.

CODING REQUIREMENTS

LENGTH:	9 positions
DECIMAL POSITION:	N/A
SPECIFICATIONS:	Should match the appropriate unclassified payroll file. The campus should remove from the section information any social security number belonging to an instructor who <u>does not teach</u> a section. When a course-section has more than one instructor, additional social security numbers should be present.
EXAMPLE:	Social Security Number is 303-34-6009; this element is '303346009'.
DEFAULTS:	A unique social security number can be present only once per course-section; <u>data for duplicate social security numbers are dropped.</u>
EDITS:	<i>1140-11 Each position must contain a numeric code, i.e., the entire field cannot be zero-filled. DATA ELEMENT DESCRIPTION

NUMBER: 1165
NAME: MULTIPLE INSTRUCTOR PRORATED EFFORT FOR CREDITS AND ENROLLMENTS
DEFINITION: For a course-section in which there are multiple instructors, this element represents the effort an instructor expends relative to that of the other instructors.

CODING REQUIREMENTS

LENGTH: 4 positions
DECIMAL POSITION: 999V9
SPECIFICATIONS: Four digits with an implied decimal between 3rd and 4th position from left. There are two ways in which this element may be reported. First, the institution may assign proration percents to each multiple instructor of a course-section, reflecting the division of instructional work-load, as can best be determined. NOTE: *The sum of proration percents for multiple instructors of a given course-section must equal 100 since related student credits, course-section credits and student enrollments must not be duplicated.* The second option available to the institution is to zero-fill the element if the institution prefers to have the workload divided equally among the multiple faculty for any given course-section.

EXAMPLE:

DEFAULTS: For this element that is zero-filled, the workload will be divided equally among the multiple faculty for any given course-section. Any non-numeric entry for this element will be converted to zero.

EDITS: 1165-11 a) *Each occurrence of an Instructor Social Security Number (DE 1140), associated Credits and Enrollments with a given course-section, requires the presence of a number which is less than or equal to 100.*
