The Department of Employee Trust Funds (ETF) authorized the release of lower-cost inflation protection options for the MutualCare Custom Solution® underwritten by Mutual of Omaha Insurance Company. This long-term care insurance policy is available to employees, annuitants and their family members.

Each year, many Americans lose income, savings and assets because of long-term care expenses. Your group’s long-term care insurance is designed to help protect against the high costs of long-term care services if you or a family member can no longer perform activities of daily living without the need for assistance. For many, long-term care insurance is an important part of planning for their long-term financial security.

The MutualCare Custom Solution policy offers additional built-in benefits that include:

• Cash benefit can be used to pay for services to support your plan of care. You simply receive the full monthly cash benefit you select to pay for anything at all…family travel expenses, lost income, housekeeping services or other out-of-pocket expenses. There’s no need to collect or submit bills.

• Cash benefits paid on the first day of need with no waiting period, allowing you to receive care in the environment you’re most comfortable in with the choice of who can be your caregiver, including spouse/partner, family members or friends. The immediate cash benefit also gives you total control of how you’re spending your benefit dollars.

• Lower cost inflation options that give you more flexibility in policy benefit choices.
