Notes on Table: Changes in Watch List designations from the previous quarter are highlighted in red. Negative tracking of greater than 0.2% constitutes underperformance for the Plan's target date retirement funds.

Yellow-Level Watch List. An investment fund goes on the Watch List with a yellow designation when two of the above occur, or when item numbers 4, 5, or 6 occur.

Orange-Level Watch List. An investment fund goes on the Watch List with an orange designation when it has been on the yellow watch list for two consecutive quarters or when three of the above occur.

Red-Level Watch List. An investment fund goes on the Watch List with a red designation when it has been on the orange watchlist for two consecutive quarters or when four of the above occur. When an investment fund is placed on the Watch List with a red designation, a formal fund review will be conducted and a recommendation for action will be made.

* Since-inception returns were used since this fund does not have a trailing five-year return.

Important Note: The investment fee analysis reported in the table above measures only the relative fee level of your current plan offerings as compared to fee medians from style, size, and vehicle-specific peer universes, which Aon Investments believes is an appropriate comparison. Determining whether an investment's expense is reasonable depends on a variety of factors including the level of returns achieved and the method with which administration and operational expenses are paid. Understanding and evaluating the total cost of plan operations, including both investment and administration fees is a critical analysis that should be completed periodically.

*Vehicle Type Definitions: "MF" = Mutual Fund, "CF" = Collective Investment Trust, "SA" = Separate Account, "SG" = Group Annuity

**Expense Ratio is intended to represent a fund's total expense ratio which may include investment management fees, 12b-1 fees, custodial fees, trustee fees, revenue sharing components and/or charges for fund or plan administration.

**Fee universes are provided and calculated by eVestment Alliance, as of July 31, 2023. Fund expense information has been sourced from eVestment for all asset classes except the stable value and target date fund universes, which uses Morningstar databases. Since fund expense ratios do not change frequently, Aon Investments believes this study to be a relevant comparison for up to a year, at which time it will be updated. For complete information on methodologies, contact your Aon Investments consultant.

TIAA Traditional Additional Notes

TIAA Traditional is a uniquely-structured fixed rate annuity contract in which participants earn a personalized rate of return based on their individual cash flow experience. This product can act as both a capital preservation option during a participant's savings phase and as an optional immediate income annuity during the spending phase.

The performance within TIAA Traditional is determined in 2 key ways:

- On a monthly basis, a new money crediting rate is issued by TIAA
- On an annual basis, contributions are grouped together based on timing and TIAA declares new crediting rates for these groups of "vintage" contributions

The resulting performance is a dollar-weighted average of the returns being earned by a participant's contributions, simultaneously, over time. As such, the performance in this report is illustrative of the aggregate performance of TIAA Traditional investors and does not reflect any one participant- or even plan-level experience in the product.

For participants that are interested in converting all or some of their TIAA Traditional balance into lifetime income at retirement, there are contractual minimum annuitization rates associated with the product. That said, participants who are invested in TIAA Traditional for longer periods also earn a "loyalty bonus," where the monthly benefit is higher than that of an annuitant who transfers the same account balance into the product at the point-of-retirement.

Plan fiduciaries do not have control over assets in TIAA's Retirement Annuity (RA), Group Retirement Annuity (GRA), Supplemental Retirement Annuity (SRA), or Group Supplemental Retirement Annuity (GSRA) annuity contracts. This is due to the individual nature of these annuity contracts. Balances in these contracts are under participant control.
