Title and Total Compensation Project

Benefits Preference Survey
Purpose
The purpose of the Benefits Preference Survey was to:

- Evaluate how well our UW benefits plans are meeting the diverse needs of our faculty and staff
- Offer employees an opportunity to share opinions and let us know what they value
- Help shape and enhance our benefits offerings in the future

Taken together, the Benefits Valuation Analysis (BVA) and the Benefits Preference Survey will be aligned to develop a long-term benefits strategy. UW System benefits experts will analyze the results and create recommendations and options that will be vetted by UW stakeholders with final recommendations sent to campus leadership for consideration. There is no intent to reduce or eliminate benefits.

Benefits Survey Summary of Results
Starting in the fall of 2018, UW System faculty and staff were invited to participate in a Benefits Preferences Survey as part of the Title and Total Compensation Project.

The survey, which was conducted in partnership with UW-Madison and administered by Mercer Consulting, focused on work-life and leave benefits by asking employees about the benefits they value most.

To ensure confidentiality, all survey responses went directly to Mercer for compilation and analysis. Survey results were provided to UW System in compiled form only and survey responses were not connected to individual names.

The Benefits Preferences Survey results will be used to develop a long-term benefits strategy for UW System that are more attractive to current and prospective staff.

Who took the survey?

18,634 employees completed survey
Nov 16 – Jan 4 survey administered online
47% participation
Each benefits-eligible employee was sent a unique link for completing the survey. Schools, colleges and divisions also identified employees who required paper surveys because they lack computer access or would be more comfortable responding to the survey in a language other than English.

What matters to you?

Benefits Importance

Pay is ranked as the single most important element, followed by healthcare, stable employment and retirement savings plans, all of which are of ‘above average’ importance.
By Age

As is generally observed, the importance of healthcare and retirement increases as a function of age. A similar profile emerges for length of service, reflecting the correlation between age and service.

By Employee Group

There is very little variability in the ranking of elements either by employee group/type location.
What benefits do you value most?

Majority of respondents say **benefits** packages meets their needs and is a factor in retention.

Approximately half of respondents are unfavorable regarding **pay**.

Opportunities to Do Better

Financial Wellness

Relatively small numbers of respondents foresee the need to rely on credit cards to pay bills over the next six months. However, slightly more than a third of respondents describing their financial situation as ‘stressful’.

While most feel they could manage an unforeseen expense of $400, one third do not believe they are doing enough to prepare for retirement.
Additional Opportunities to Improve

Based on survey responses, UW–Madison is beginning to identify areas that present opportunities for possible enhancements.

- Advancement Opportunities
- Parking Access & Costs
- Paid Family Leave
- Job security

Survey respondents also indicated the additional benefits they value most in a range from very important to those that would be appreciated as an extra perk.
