FINANCIAL MANAGER

I. DEFINITIONS

FINANCIAL MANAGER

Positions at this level are professional supervisors and managers, which function as the Controller for an operating unit or program, such as a division or institution, where there is significant decentralization of financial operations. Positions organize, direct, control and evaluate a variety of financial activities including the planning and development of the institution’s basic systems of accounting and financial control. Prepares financial analyses of operations, prepares reports on financial position based on past, present and future operations and directs the preparation of budgets and financial forecasts.

II. QUALIFICATIONS

Professional training in accounting or auditing such as that which would be acquired by earning a Bachelor's Degree in accounting or auditing from an accredited post secondary college/university; or commensurate experience and training. In addition, extensive knowledge and experience in financial administration as well as a Wisconsin Certified Public Accountant (CPA) certificate are desirable qualifications.
