

University of Wisconsin System SFS User Quick Help Document How to Correct Oracle Sign on Screen for nVision Client

What to do When a User is Taken to the Oracle Sign on Sheet

This Quick Help document is designed to walk the nVision user through the process of ending a remote app session for nvision client. This can be a useful self-help when a user unexpectedly gets an Oracle Sign on after clicking "Enable Editing".

1. The issue begins when you click the "Enable Editing" button in the top yellow bar.

3. With Excel open, **go** to File> Options> Trust Center> Trust Center Settings> Protected View
4. **Make sure** all boxes are not checked.
5. **Click OK.**

6. You should no longer have an issue with your nVision layout. If you continue to have problems, please contact UWSA Problem Solvers for help.
