

On occasion, nVision client users have encountered the following error regarding trees which are related to nVision reports. If you are sure that the tree is valid and active, you can correct this error by performing the following steps in SFS.

1. **Navigate** to PeopleTools > Utilities > Administration > TableSet Control

2. Enter the *Set ID* for the report. Click

Search

Favorites Main Menu > PeopleTools > Utilities > Administration > TableSet Control

TableSet Control

Enter any information you have and click Search. Leave fields blank for a list of all values.

7. Click Save .

NOTE: If a tree is already set up using the “Default SetID”, then it does not need to be added to the TableSet Control Tree Page again.

The “Default SetID” value should **NOT** ever be changed.
