

How to Setup a Non-Employee Profile in e-Reimbursement

1. Click the **Expense WorkCenter** tile

2. Scroll down and expand **Employee Data**
3. Click the **Update Profile** menu.

4. Determine what the new non-employee ID number will be by changing the “Search By” drop-down box to Employee ID. Enter “NE” plus the individual’s initials (First Middle Last). If no middle initial is provided on the form, we use the letter “Z”. Click search. A list of all non-employee IDs that start with the five letters entered displays. Choose the next 3-digit number in the list, making a new 8-digit non-employee ID number. Write this number down.
****NOTE: If the non-employee is actually an employee from another campus, please have them use the Custom Funding on the TER to charge to another campus.**
Example: In the example below, the next available non-employee ID would be NEMLS006.
