

ITMC
April 15, 2019

Agenda

1. Review of Activity since Fall 2018 Meeting

- A. Campus Site Visits
- B. Customer Council Established
- C. Service Lifecycle
- D. Conceptual Roadmap
- E. Service Definitions

2. Update on Service Definitions

- A. Socialization
- B. Approval
- C. Next Steps

3. Review of Service Lifecycle

- A. Decide Phase
- B. Develop Phase Draft
- C. Deploy Phase Draft

4. Service “Soft-Launch”

5. What is UWSS Working On

- A. Soft Launch
- B. Develop & Deploy Stages
- C. Organization Structure

Campus Site Visits

Institution	Date
UW-Milwaukee	6/27/2018
UW-Superior	8/15/2018
UW-Madison	9/6/2018
UW-Oshkosh	9/24/2018
UW-La Crosse	10/9/2018
UW-Parkside	10/23/2018
UW-Eau Claire	11/13/2018
UW-Platteville	11/26/2018
UW-Green Bay	11/27/2018
UW-Stout	12/13/2018
UW-River Falls	12/14/2018
UW-Stevens Point	1/7/2019
UW-Whitewater	1/23/2019

Campus Visits – Lessons Learned

1. Myths Persist

A. ~~Centralization~~ means everything moves to Madison

- Standardization
- Potential utilization of campus based staff in service development and support
- COE Partnerships (Services as an agent of UWSS)
- Some services delivered from Madison

B. ~~Madison~~ (UW-Shared Services) is just going to come in and take over

C. ~~UW-Shared Services~~ will just apply what UWC did to the comprehensive institutions

D. ~~UW-Shared Services~~ is a job saving program for UW Colleges and Extension staff

Restructuring Objective Bullet #4:

- Further standardizing and regionalizing administrative operations and services to more efficiently use resources;

2. There is support (some guarded) for the Shared Services Concept

- A. Majority of campuses supported the concept
- B. Several wanted to be first in line for services
- C. Skepticism (devil is in the details)
- D. Wait and see approach

3. List of pain points and possible service areas

- A. 22 service suggestions
- B. 15 additional service suggestions from CIO's, emails, etc.

Socialization Timeline

Nov. 16, 2018	Customer Council Established
Jan. 9, 2019	Customer Council Meeting (shared Roadmap)
Jan. 10	UW - Shared Services Town Hall Meeting
Jan. 14-18	SME Council Meetings (shared Roadmap)
Jan. 28-Feb. 1	SME Council Meetings (discussed Roadmap feedback)
Jan. 31	CBO Meeting (shared Roadmap)
Feb. 6	Provost Meeting (shared Roadmap)
Feb. 13	Customer Council Meeting (shared Service Definitions)
Feb. 11-15	SME Council Meetings (shared Service Definitions)
Mar. 5	Provosts & CBO's Meeting (shared Service Descriptions)
Mar. 8	Service Definitions approved by Exec. Director
Mar. 12	Service Definitions approved by Vice President Cramer
Mar. 18	Customer Council Meeting (Service Definitions, Service Lifecycle)
Mar. 22	Chancellors Meeting (shared Service Definitions)
Mar. 22	Service Definitions approved by President Cross

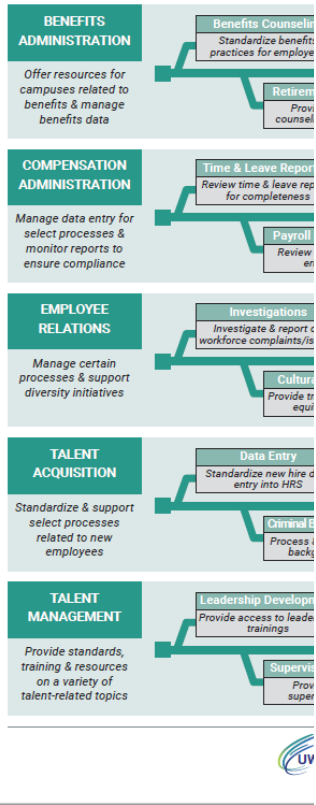

Conceptual Roadmap

CONCEPTUAL ROADMAP

Human Resources

UW-Shared Services could focus on standardizing business processes, and offering some transactional services, and offering some optional transactional services, covering Procurement and General Accounting.

The following 20 Services grouped into 5 Sub-Functions were identified based on initial feedback from stakeholders.

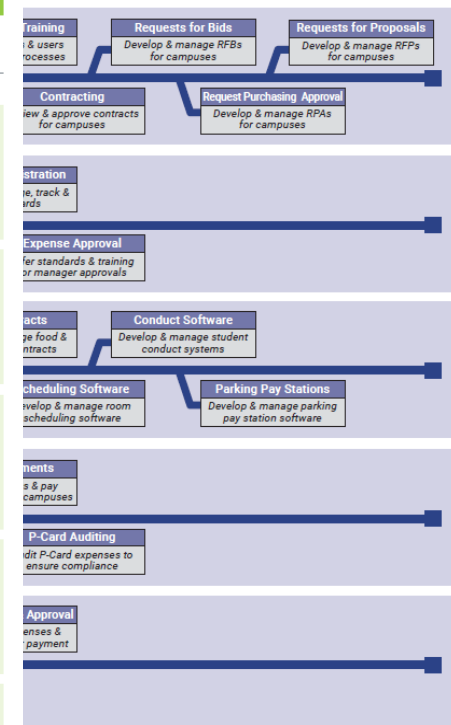

CONCEPTUAL ROADMAP

Business Services

Standardizing business services and offering some optional transactional services, covering Procurement and General Accounting.

b-Functions were identified based on initial feedback from stakeholders.

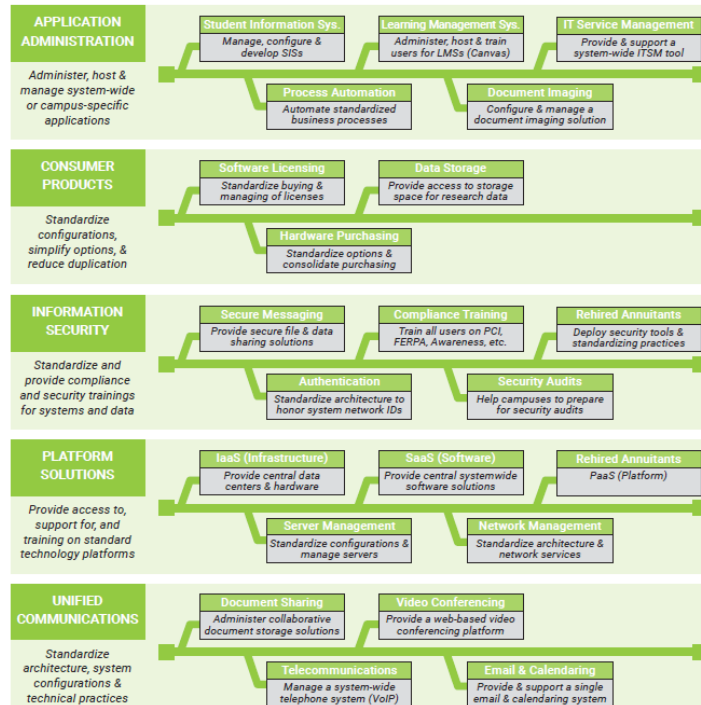

CONCEPTUAL ROADMAP

Information Technology

UW-Shared Services could focus on standardizing practices and training related to data and systems, and offer niche technical services that may be difficult or expensive for campuses to procure independently.

The following 22 Services grouped into 5 Sub-Functions were identified based on initial feedback from stakeholders.

Service Definitions

SERVICE DEFINITION

Version 3.0 – March 11, 2019

INFORMATION TECHNOLOGY

Hardware Purchasing

Develop hardware standards and purchase hardware equipment across the UW institutions

DESCRIPTION OF THE SERVICE

UW-Shared Services equipment, inform the institutional IT departments of hardware for institutions. This service will eliminate campuses and ensure with the overall UW-Shared Services specifications. UW-Shared Services customization options. UW-Shared Services purchase requests, purchases to simplify Services will establish is available for the

INFORMATION TECHNOLOGY Hardware Purchasing

Version 3.0
March 11, 2019

ANALYSIS

BENEFITS	RISKS
<ul style="list-style-type: none"> Reduces costs of managing hardware inventory across the institutions by centralizing inventory Reduces effort required by institutional IT departments to manage configurations and options Reduces security risk due to standardization and consistency in hardware and configurations Maximizes buying power and leverage 	<ul style="list-style-type: none"> May reduce options for faculty, staff, and students from the current offerings at their institutions May not permit faculty, staff, and students to use platforms and hardware that they prefer depending on the options selected

PARTICIPATION MODEL

The *Hardware Purchasing* service should be mandatory for all comprehensive institutions given the benefits of reducing cost and effort across the UW institutions by standardizing hardware options and configurations. Institutional IT departments should identify the hardware options that are required to meet the needs of their constituents to ensure this service is responsive to all customers across the UW System.

Implementing this service should have a relatively low fixed cost but would require some upfront effort to standardize options and configurations across the UW institutions. Also, given the scale that UW-Shared Services can achieve from offering these purchasing options and the relatively low costs of processing purchase requests, it would be reasonably inexpensive to implement this service across all UW institutions. Given the financial benefits that the UW System can achieve through combined buying power across the UW System, this service should be mandatory for all UW institutions.

FUNDING MODEL

The *Hardware Purchasing* service should be funded by UW-Shared Services base funding. Institutions should not be charged directly for this service, given the need to incentivize the use of these security operations and eliminate any potential barriers. Institutions would be responsible for providing funding directly for the hardware and equipment they request, but the administration of hardware standards should be base funded.

Given the high financial benefits associated with central hardware standards and purchasing processes, UW-Shared Services should ensure that institutions use this service as much as possible. Charging the institutions through fees or chargebacks could create disincentives to using the standard hardware options, which would limit the benefits of this service.

Also, the administrative effort and cost of monitoring the use of the standards would likely be prohibitively high. Allocating base funding for this service should establish the appropriate incentives across the institutions to fully utilize these hardware options and configurations and should limit the administrative effort required to manage the funding model. Institutions would be charged for hardware using their existing fund codes to ensure streamlined billing and customers are appropriately funding the hardware they request.

SERVICE DEFINITION

Version 2.0 – March 11, 2019

HUMAN RESOURCES

Criminal Background Checks

Centrally managed

DESCRIPTION OF THE SERVICE

UW-Shared Services Background Check work with institutions require CBCs and "Position of Trust" received a check UW-Shared Services the appropriate review, then UW-Shared Services the institutions determination at At the outset, UW-Shared Services policy determine when

FORMS OF THE SERVICE

STANDARDS

SUPPORT

HUMAN RESOURCES Criminal Background Checks

Version 2.0
March 11, 2019

ANALYSIS

BENEFITS	RISKS
<ul style="list-style-type: none"> Decreases financial, regulatory, and legal risk through standardization and consistency of CBC processes Relatively easy/inexpensive to scale across the System Eases the burden on institutional HR offices Achieves efficiencies in processing CBCs centrally 	<ul style="list-style-type: none"> May be difficult to identify all employees who need a new CBC at least initially May require significant initial effort to train existing employees during the roll out of this service Could increase the number of CBCs run across the UW System due to consistent application of policies

PARTICIPATION MODEL

The *Criminal Background Checks* service should be optional for any comprehensive institutions that need support for criminal background checks. Some institutions have been facing capacity issues that limit their ability to manage CBCs. UW-Shared Services can support those institutions but does not need to roll out this service to all institutions at the same time given the fact that some institutions can manage their own CBCs currently. Given the relatively low upfront costs to implement this service, the high volume of CBCs across the UW System, and UW's leverage with the GIS vendor, UW-Shared Services will be able to scale this service to gain efficiencies and standardize and eliminate deviations in the practices.

There could be benefits to the UW System of standardizing this service across all institutions in the future to reduce high legal, reputational, and financial risk related to employee and volunteer CBCs and feedback from institutional stakeholders and leadership from UW System Administration. However, given that some institutions still have capacity and expertise for CBCs, this service should be optional. As more institutions opt into this service, UW-Shared Services could investigate whether to make this service mandatory.

FUNDING MODEL

The *Criminal Background Checks* service should be funded by a combination of UW-Shared Services base funding and transaction-based chargebacks. The chargebacks should be based on the direct costs for running a CBC with the GIS vendor (roughly \$12 per check), but base funding should cover the majority of the staffing and maintenance costs for the CBCs.

This service should be at least partially base funded to incentivize institutions to use this service given the risks attendant to CBCs. By offering base funding, institutions will not need to be concerned about the costs of the CBC staffing and system maintenance and should request as many CBCs as they are required to by UW System policy.

However, institutions should pay at least partially for vendor costs of running CBCs, so customers internalize the minimal direct costs and acknowledge the volume of CBCs that they request. This funding model should allow UW-Shared Services to adequately maintain the CBC team and systems while minimizing the administrative effort required to track support offered to each institution.

RECOMMENDATION

OPTIONAL PARTICIPATION
For any of the eleven comprehensive institutions in the UW System that opt into this service

RECOMMENDATION

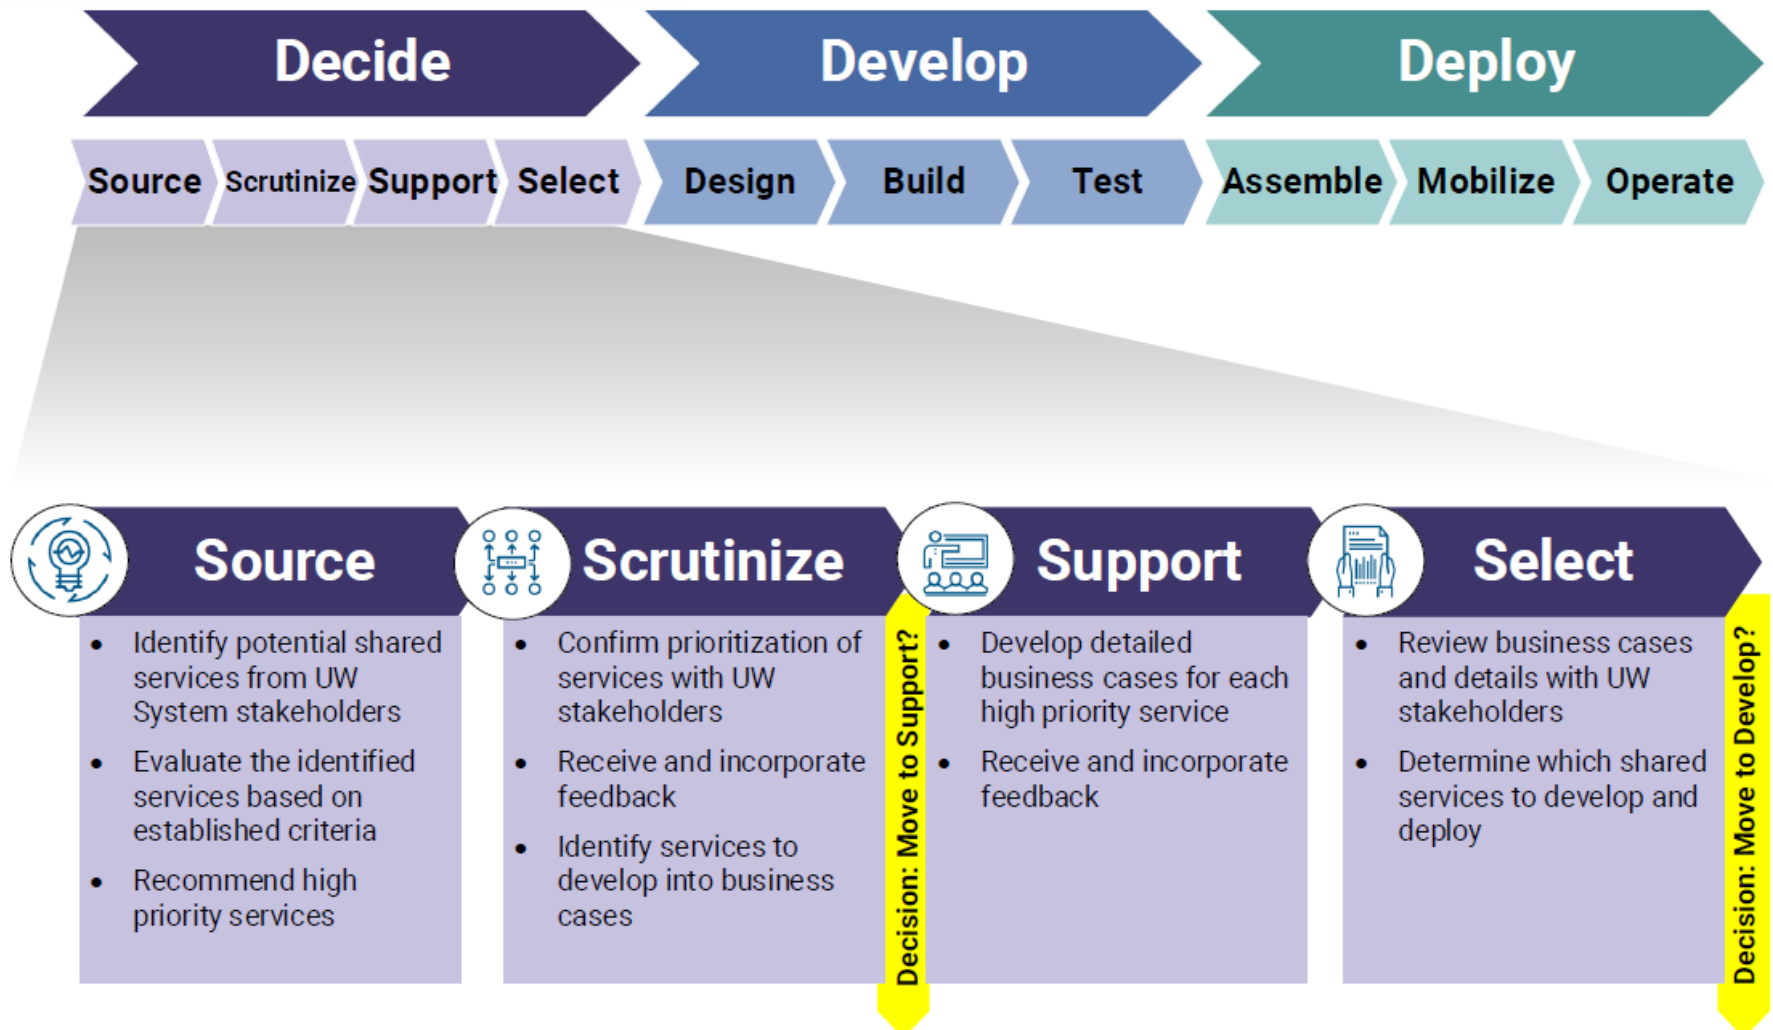

TRANSACTIONAL CHARGEBACKS	BASE FUNDING + CHARGEBACKS
	This service should be funded by a combination of funds

Service Lifecycle

Phase 1: Decide

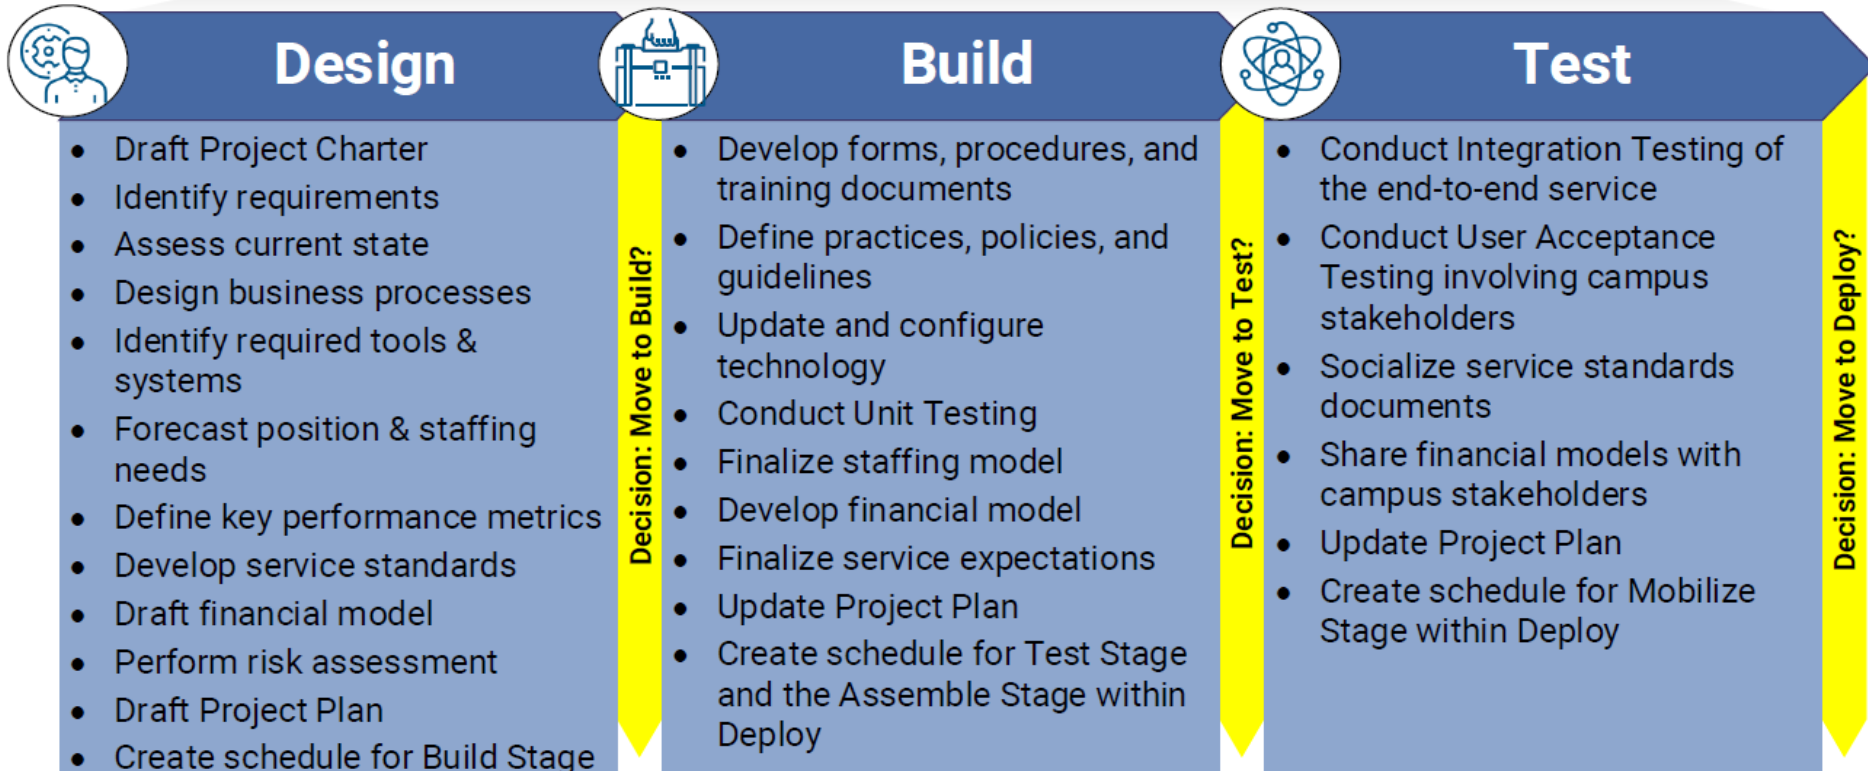

Service Lifecycle

Decide Phase Process Flow – Full

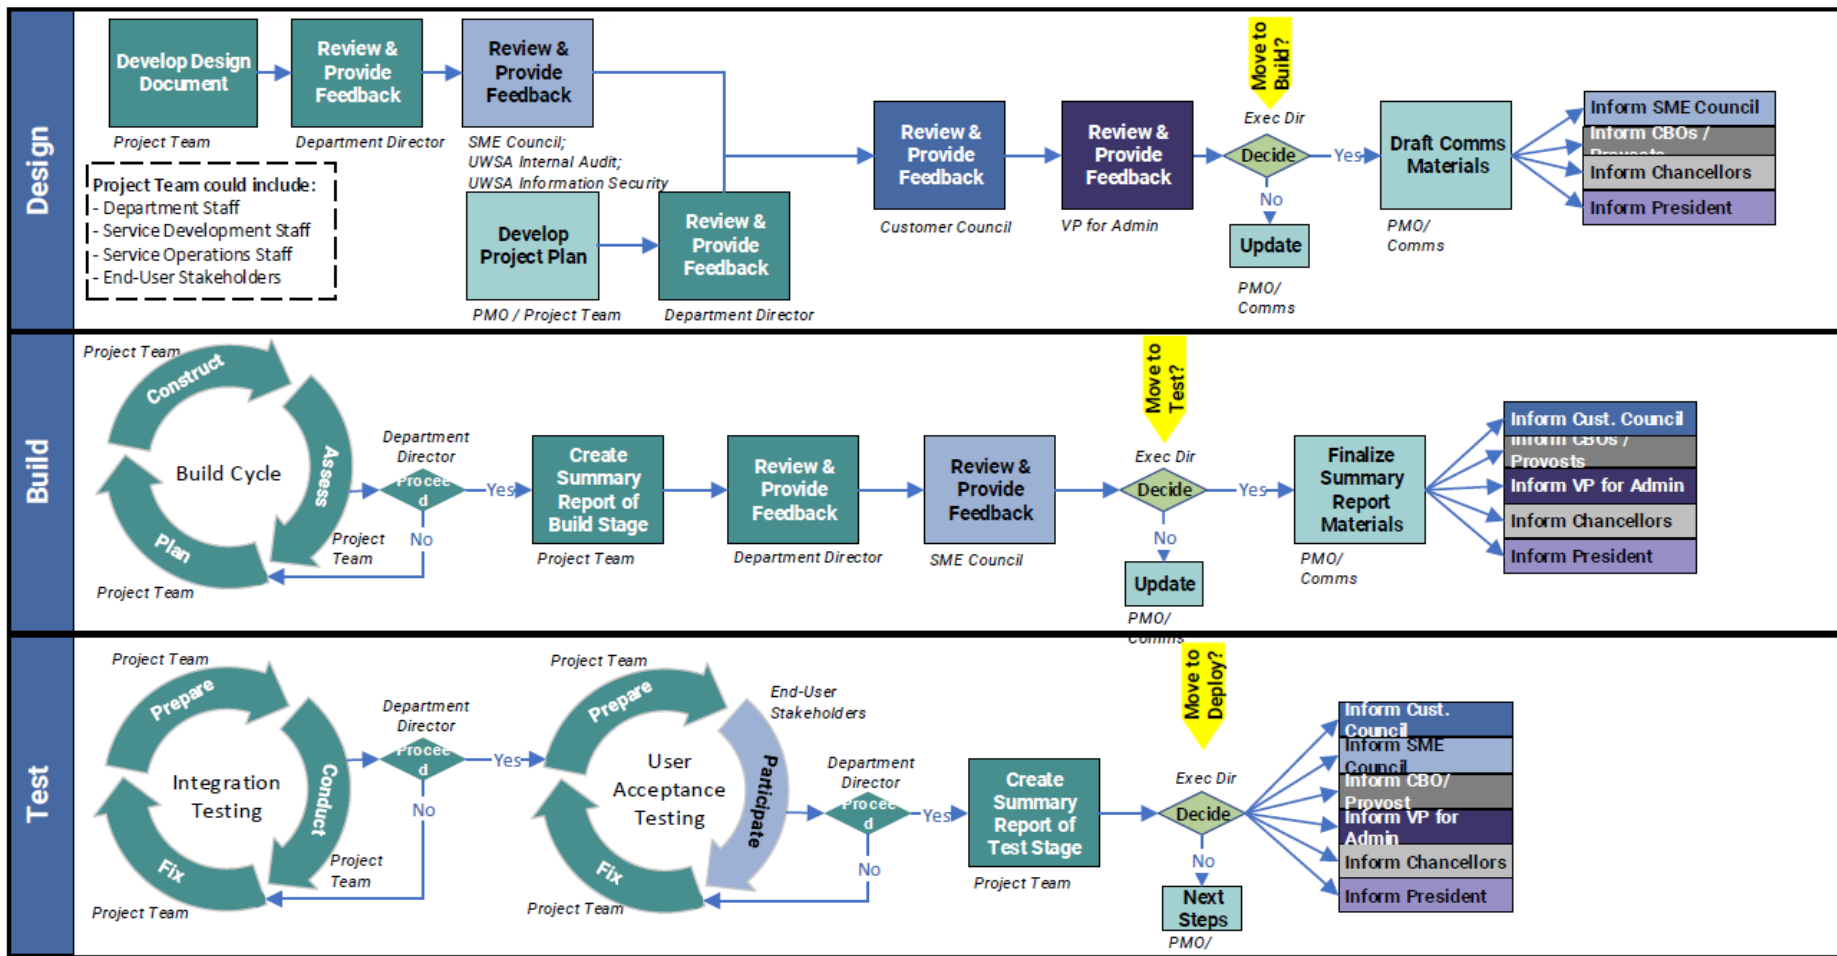

Service Lifecycle

Phase 2: Develop

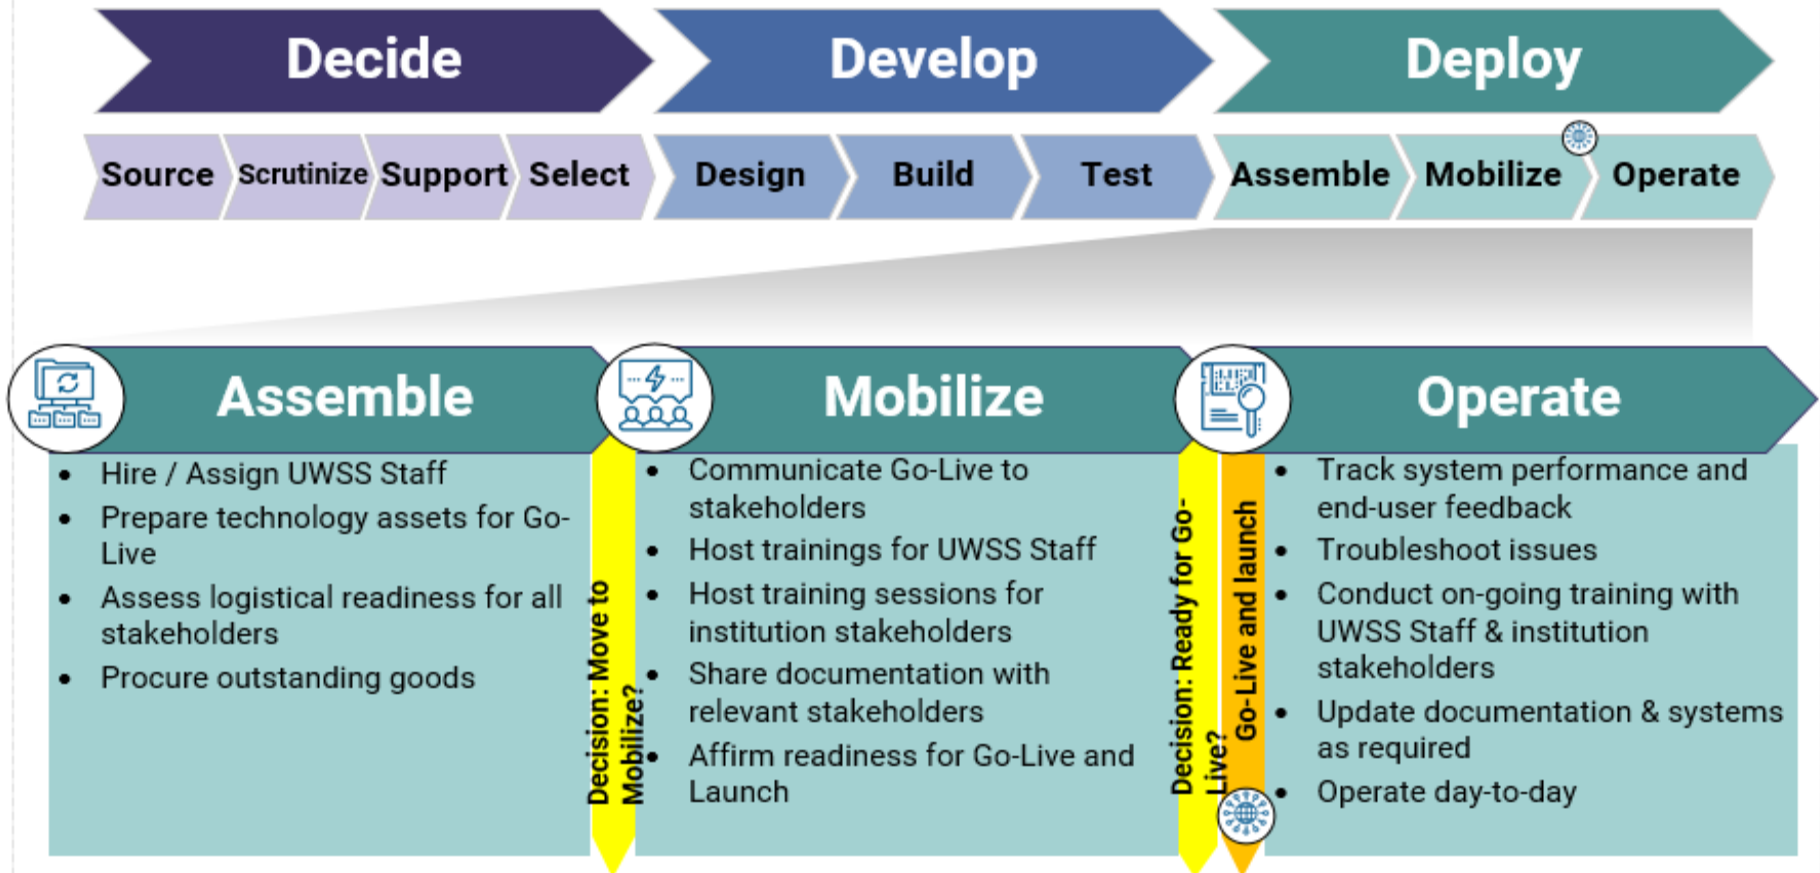

Develop Phase Process Flow

Service Lifecycle

Phase 3: Deploy

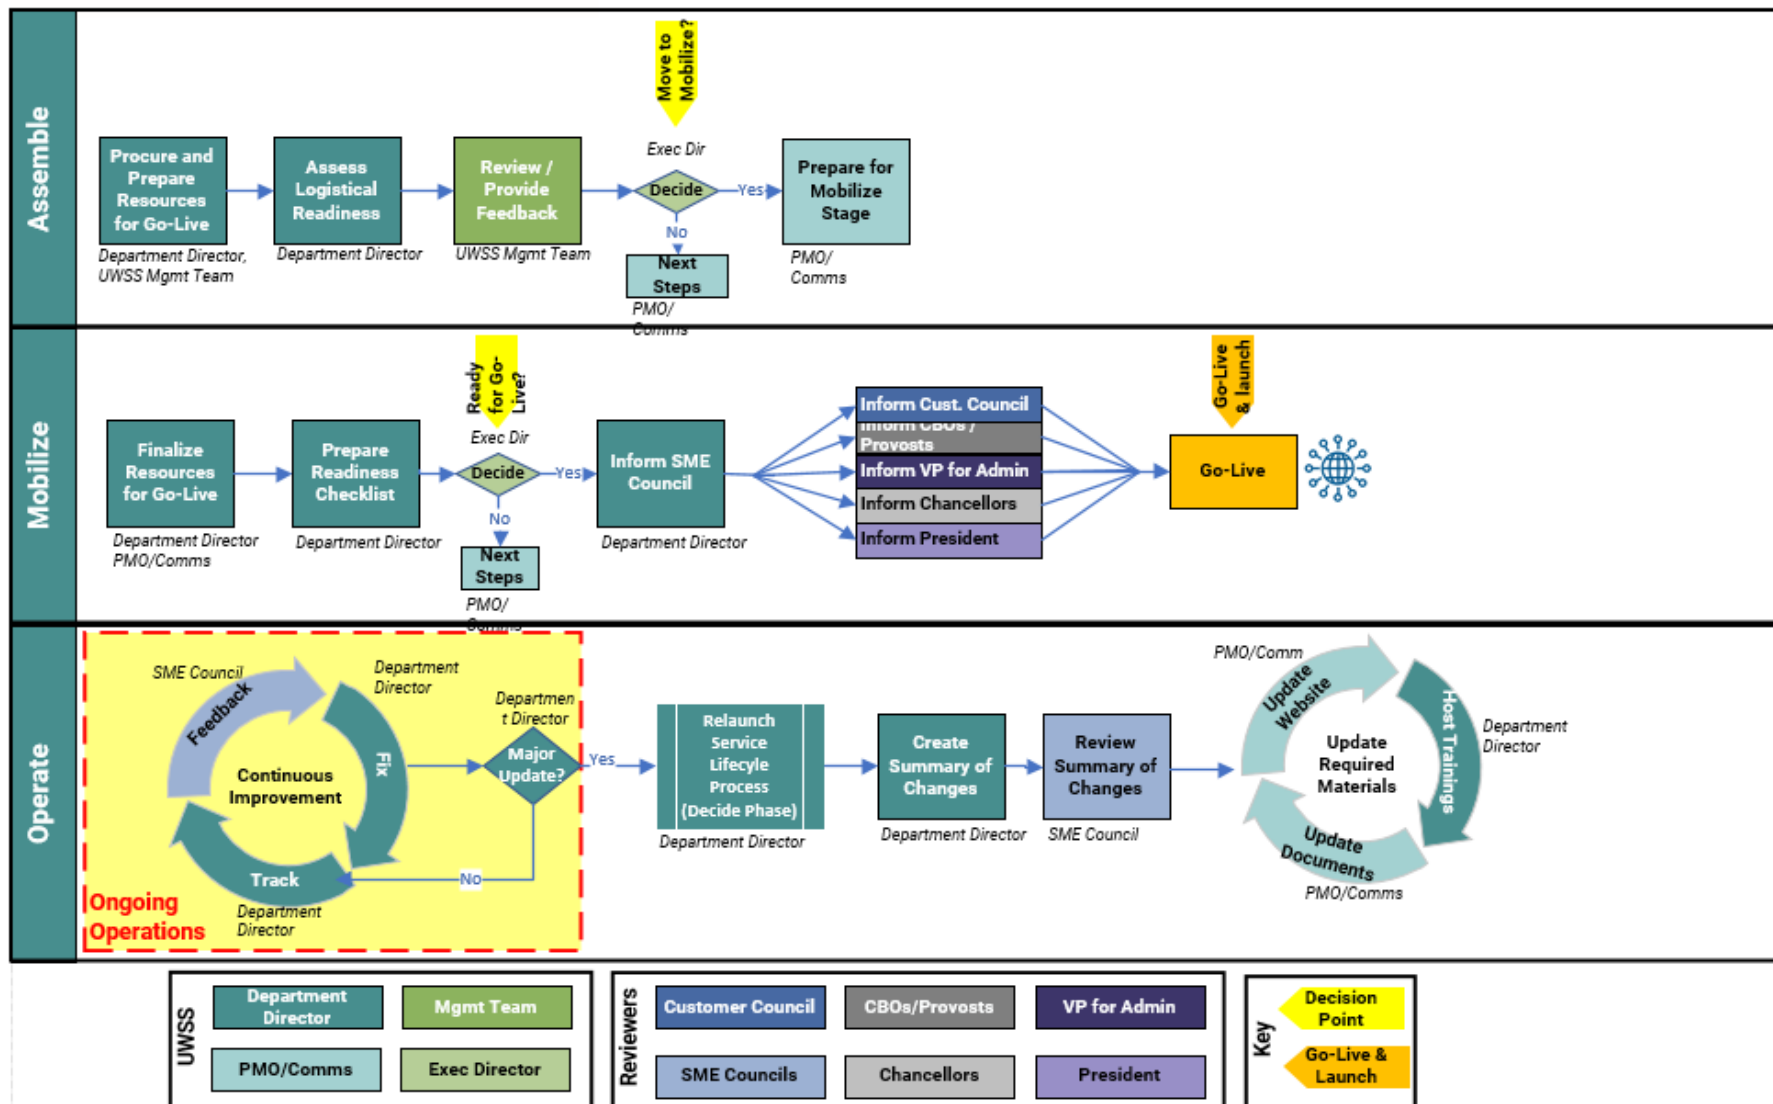

Note: The Deploy Phase can be completed as one large group or consist of multiple smaller waves with independent decision points and Go-Lives as depicted below:

Service Lifecycle

Deploy Phase Process Flow – Full

Service Soft-Launch

- Some Roadmap Services:
 - Already exist in some form, *and*
 - Have been previously requested by specific institutions, *and*
 - Have been provided by Col-Ext on a tactical basis
- Sunset of Col-Ext requires a decision:
 - A. Terminate; develop & deploy later
 - B. Prioritize; fully develop & deploy, no soft-launch
 - C. Prioritize; review and edit for soft-launch, full develop & deploy to follow

Service Soft-Launch

- Conditions for Soft-Launch
 - Service is on the Roadmap
 - Service is  brand-worthy
 - Soft-launch carries manageable risk
 - Continued dependency by existing customers
 - Value in testing through a soft-launch
- Soft-Launch qualifiers
 - Not a substitute for Develop & Deploy phases
 - Scaling may not be available
 - Not all UW-Shared Services support structures will be in place

Soft-Launch Candidates

April, 2019

Function	Service	UWSS Initial Customers	Roadmap Service?	Service Definition?	Launch Date
Information Technology	Student Information Systems	3 Institutions	Yes	Yes	Est 4/15/19
Human Resources	Investigations	3 Institutions	Yes	Yes	4/8/19
Business Services	Procurement Training	All Institutions	Yes	Yes	Est 4/29/19
Human Resources	Payroll Error Reporting	3 Institutions	Yes	No	4/8/19
Human Resources	Time & Leave Reporting	3 Institutions	Yes	No	4/8/19

What is UW-Shared Services Working On?

- Complete the Soft-Launch
- Planning for service launches in FY20
- Forming a UW-Shared Services PMO
 - Combining PMO's from HRS Service Center and Central IT
 - Internal use only, not a service available outside UWSS
- Finalize the organizational model and org charts
 - Workflow in a matrix model
- Finish creation of the organization in UW-Service Center, SFS, etc
- Identifying organizational policy needs (adopt or create new)
- Design of the Customer Success model

What is UW-Shared Services Working On?

- Finalize Develop & Deploy Stages
 - Developing service checklists
 - Identify documentation requirements
 - Future State Requirements
 - Design Document
 - Project Plan
 - Roles and Responsibilities Matrices
 - Business Process Maps
 - Staffing Model
 - Financial Model
 - Service Standards Documentation
 - Training Plan
 - Summary Report of Test Stage
 - Assemble Stage Checklist
 - Mobilize Stage Checklist
 - Go-live Readiness Checklist
 - Develop supporting processes
