Delete Footnote

Delete Footnote - equivalency programming has not been completed.

To delete a footnote it must be removed from the associated equivalency record and that cannot be done at this point.

This function may be used to remove footnote text records to the TIS database. It's primary use is to eliminate a record which is no longer being used or has major errors, usually prior to reading the correct footnote text. Before a record can be deleted, the footnote number must be removed from all associated equivalency records. Deletions may be done only to footnote text records for your institution (i.e where your institution is the TO institution and when you are authorized to delete footnotes). Footnotes numbered in the range 1-199 are systemwide footnotes and may be deleted by System Administration staff

only.

Function: Available to authorized users.

Requirement: Must choose Institution from the dropdown list before entering search criteria. If an institution is not chosen an error screen will appear.

There are 3 options for adding a footnote text:

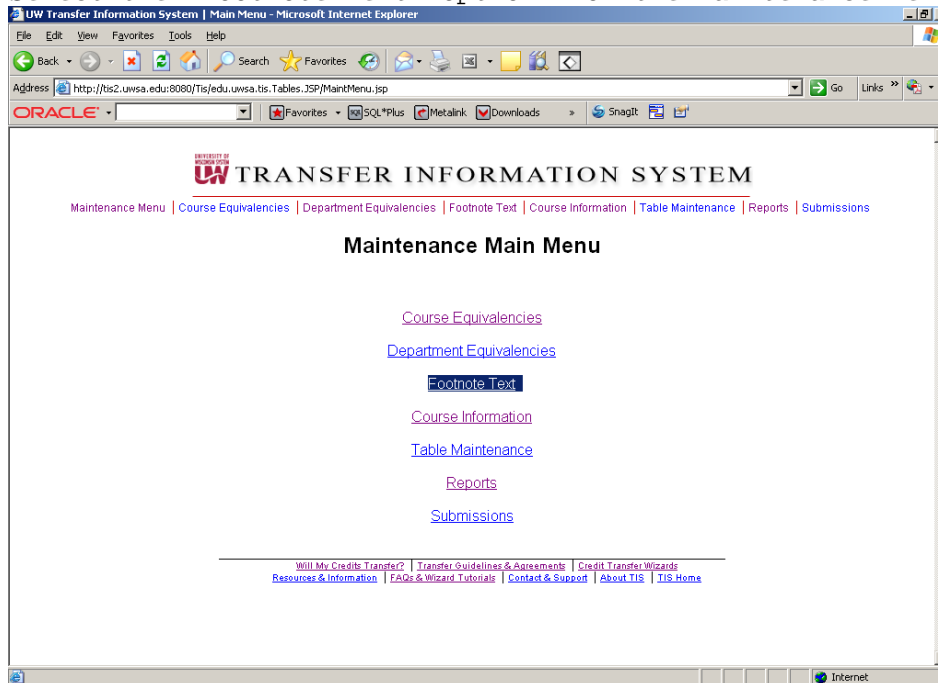

Option 1 - Choose the institution and press continue button and the Footnote Table screen with the ADD NEW button available will display and the list of footnotes will be a complete list for the institution chosen.

Option 2 - Choose the institution and put in a "Starting From Number" or "Suffix". Press the CONTINUE button and the footnote table screen with the ADD NEW button available will be displayed and the list of footnotes will start with the number or suffix that you entered

Option 2 - Choose the institution and press "SEARCH FOOTNOTE TEXT" button. The Footnote Table screen with the ADD NEW button available will display and the list of footnotes will be the search criteria chosen

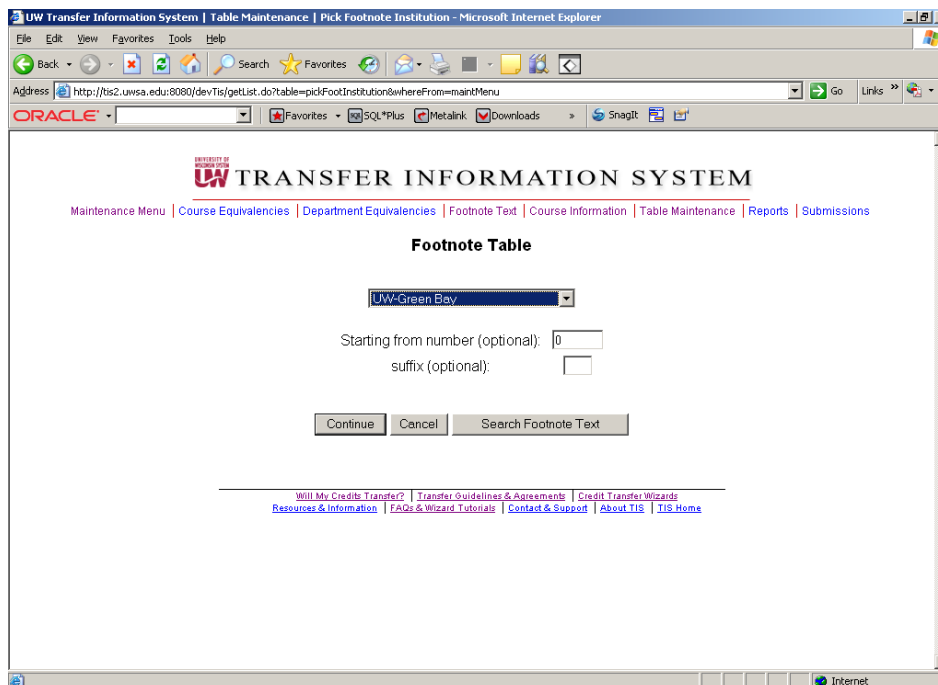

Delete Footnote: Option 1 (Choose Continue Button):

Select the "Footnote Text" option from the Maintenance Menu.

Determine the footnote number and text to be deleted.

Choose: UW Green Bay as the institution from the drop down list
